MEDIA RELEASE

For immediate release

geoLOGIC to host “Month of Meals” for Calgary’s less fortunate.

CALGARY, October 5, 2009 – In the spirit of Thanksgiving, Calgary-based oil and gas data and software company geoLOGIC systems ltd. will sponsor and host a series of meals at four Calgary-area shelters throughout October. geoLOGIC’s so-called “Month of Meals” is the culmination of a variety of community-focused efforts undertaken by the company as part of a year-long celebration of its 25th anniversary.

“We have been very fortunate to have the support of Calgary’s oil and gas community over the past 25 years,” said geoLOGIC President and CEO David Hood. “And while our efforts in the community won’t end here, we felt it was important that our 25th year celebration have an outward focus, rather than an inward focus.”

For a number of years, geoLOGIC has co-hosted a popular Stampede event, called “The Spaghetti Western”, where oil and gas industry guests are treated to an array of pastas, sauces and entertainment in a downtown park. Given the economic climate and its impact on the oil and gas industry and the community as a whole, geoLOGIC and its event co-host, AJM Petroleum Consultants, felt it would be more appropriate this year to focus resources on the charitable and community organizations they each support.

“In lieu of hosting the Spaghetti Western event this year,” continued Mr. Hood, “geoLOGIC decided to extend the Spaghetti Western spirit to the broader community by hosting four meals at local shelters to help feed hungry individuals and families in Calgary.”

On four occasions in October, geoLOGIC staff will serve meals to patrons of the following community support organizations:

The Calgary Drop-in & Rehab Centre

423 4th Avenue SE
Thursday, October 8th
Lunch (11:30 am – 1pm)

Inn from the Cold

110 11th Avenue SE
Wednesday, October 14th
Dinner (5:30 pm – 7pm)

The Salvation Army Centre of Hope

420 9th Avenue SE
Tuesday, October 13th
Lunch (11:30 am – 1pm)

The Mustard Seed

102 11th Avenue SE
Friday, October 23rd
Lunch (11:30 am – 1pm)

About geoLOGIC systems ltd.

Alberta-based geoLOGIC systems ltd. has been creating and supplying data and integrated software solutions to the energy and production industry since 1983. The company’s premier product, geoSCOUT, is a fully integrated, Windows-based exploration system that supports oil and gas professionals in their search for resources by combining presentation-quality mapping and cross-section tools with data handling and analysis software. The geoLOGIC Data Center (gDC) supplies customers and software partners with high quality data in the open Public Petroleum Data Model (PPDM) format.
